

Class Test (SETA)

1. In the table given below, the monthly expenditure of a family for three months is given.

Month	Amount of Expenditure (in Rs.)
Baisakh	24,000
Jetha	28,000
Asar	20,000

- Represent the above information in a pie-chart. (2 marks)
 - Calculate the average expenditure of the three months of the above data. (1 mark)
 - If the mean of 6, 9, 13, 15, 17 and x is 11, find the value of x (2 marks)
2. The B.P highway distance between Kathmandu and Bhakundebeshi is 44000 meter. Write down the number in scientific notation. (1 mark)
- Express 0.93 into Fraction. (2 mark)
 - Convert 512 into quinary number system (1 mark)
 - If $A = \{d, o, n\}$ and $B = \{m, a, n, y\}$ then show the members of sets A and B in Venn diagram. (1 marks)
3. Solve the following equations by Substitution method: $2x + y = 7$ and $x - y = 1$. (2 marks)
4. Find the HCF and LCM of the expressions : $m^2 + 2m$, $m^2 - 4$, $m^2 + 3m + 2$ (3 marks)
5. Mr. Gurung borrowed a loan of Rs 25,000 from Mr. Pandey at 12% p.a. At the end of 3 years, if he agreed to pay Rs 26,300 with a goat to clear his debt. Find the cost of goat. (3 marks)
6. The marked price of a mobile is Rs 5,650 and the shopkeeper allows 20% discount to the customer.
- Calculate the discount amount. (1 mark)
 - How much should a customer pay for it? (1 mark)

Class Test (SETB)

1. In the table given below, the monthly expenditure of a family for three months is given.

Month	Amount of Expenditure (in Rs.)
Bhadra	18,500
Ashoj	22,300
Asar	26,200

- Represent the above information in a pie-chart. (2 marks)
 - Calculate the average expenditure of the three months of the above data. (1 mark)
 - If the mean of 5, 8, 12, 14, 19, and x is 12, find the value of x . (2 marks)
2. The distance between Biratnagar and Dharan is 58,000 meters. Write the number in scientific notation. (1 mark)
- Express 0.33 into Fraction. (2 mark)
 - Convert 385 into the quinary number system. (1 mark)
 - If $A = \{r, a, t\}$ and $B = \{r, a, t, c, h, e, r\}$, show the members of sets A and B in a Venn diagram. (1 mark)
3. Solve the following equations by Elimination method: $2x + y = 7$ and $x - y = 1$. (2 marks)
4. Find the HCF and LCM of the expressions : $m^2 + 4m + 3$, $m^2 - m - 6$, $m^2 + 2m$ (3 marks)
5. Mr. Koirala borrowed a loan of Rs 32,000 from Mr. Shrestha at 8% p.a. At the end of 3 years, he paid Rs 34,400 along with a bicycle to clear his debt. Find the cost of the bicycle. (3 marks)
6. The marked price of a laptop is Rs 62,500. The shopkeeper allows 18% discount to the customer.
- Calculate the discount amount. (1 mark)
 - How much should the customer pay for it? (1 mark)
